

Witness Card for Investigator #5 – Jianguo (Dr. Chen), Age 52

Welcome to Zanzibar ! I don't meet many Western people! I am glad that you are learning about new model of medical practices. Chinese medicine has a lot to offer – and as you can see from this restaurant, we've been in Zanzibar for nearly a century. Actually, the Chinese have been in East Africa – on a less regular basis – for millennia, but now we are here as residents.

John? An American man? I'm confused – I thought, my secretary said, that you were a journalist writing about..... You are an investigator? An American was killed? I didn't know....I don't think I've ever met him. Let me think.....Ah, the man who came with Azizi? Sorry that I didn't remember right away. I only met him once, and it was a very busy day at the office.

I have no idea who could have killed him if that's what you are asking. When he died, I was in China visiting relatives. I studied medicine in Shanghai, so I went there to visit friends, and then I visited some relatives in the small town that I came from. I just arrived back here two days ago.

So you want to know who might have killed him and why? Let me think. I believe there was talk about him having a relationship with some young woman. Maybe someone on a spice plantation? I don't know; it was just a rumor, so I didn't pay much attention. But if it is true, then her family would have been very angry. Sorry. That's all I know.
