

Today in my class, we learned where the United States is on the map. It is very big! My country is part of the Middle East. Can you put all the countries of the Middle East in their right place on the map? It's like a puzzle!

Now, can you find which one is my country, Iran? Use your blank sheet of paper and trace around the shape of Iran. Write the name of the country next to it. Now you have a picture of my country!
